PRESS RELEASE

The Warren County Drug Task Force has developed information of at least one individual involved in selling crushed chlorine tablets as bath salts in the Mason area. Several doses of what appears to be chlorine tablets crushed in bath salts containers have been seized by the drug task force.

Although legislation has passed in Ohio making the possession and/or sale of bath salts illegal, this will not take effect until late September 2011. This release is designed to alert the public as to this extreme health issue if chlorine is ingested, and to seek medical assistance immediately if this occurs.

The drug task force is in the process of contacting the local hospital emergency department's to be on the lookout for this type of admission.

John J. Burke
Commander
