## MEDIA RELEASE

February 23, 2016

### 18 YEAR OLD ARRESTED FOR TRAFFICKING IN LSD & DESIGNER DRUGS

The Warren County Drug Task Force has completed a one month investigation into the drug trafficking activities of **18 year old**, Logan Fitzpatrick of Mason, Ohio.

**Logan Fitzpatrick**

This investigation began in January after detectives received information indicating Fitzpatrick was trafficking in various drugs throughout the Mason and Deerfield Township areas of Warren County.

Undercover detectives purchased bulk amounts of LSD and a synthetic designer drug known as 25C-NBOMe oftentimes referred to as "25C." Additionally, Fitzpatrick sold detectives a sample dose of Ecstasy (MDMA) and was also involved in trafficking marijuana.

The synthetic designer drug "25C" is commonly sold as LSD and typically obtained through online and other illicit sources. The hazards associated with designer drug use are significant as these drugs are constantly changing. As these drugs change, so do the potential consequences for users to include accidental overdoses and possibly death.
